

CERA-CHEK™ 1070

Blood Glucose Monitoring System

Hematocrit Free 10~70 %

- *Pregnancy & new-born testing*
- *Home and hospital use*

Model : G 300

10 ~ 70 %
Hematocrit range

10%~70%

10 ~ 900 mg/dL
Broad measurement range

0.5 µl
Tiny sample volume

Alternative site testing

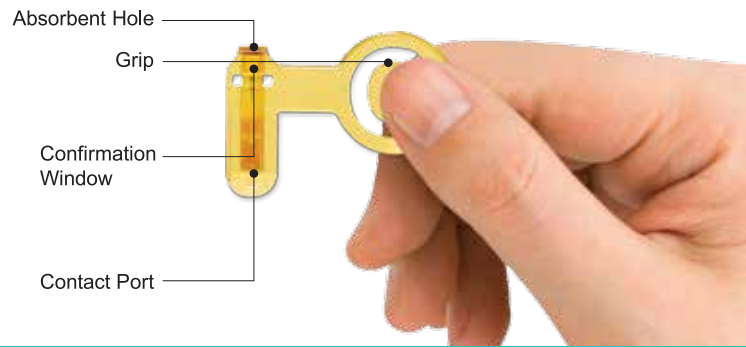

5 Seconds
Fast test time

FAD-GDH enzyme

Hygienic and Comfortable Big Strip, Easy Grip

Model : G 300

Technical Specifications

Model No.	G 300
Methodology	Electrochemistry
Measurement Time	5 Seconds
Blood Sample Volume	0.5 μl
Sample Type	Whole Blood (Capillary or Venous)
Measurement Range	10~900mg/dL(0.6 ~50 mmol/L)
Memory	1,000
LED Indicator	Indication LED lighting
PC Interface	USB
Calibration	Code Key
Operation Condition	Temp. : 4 ~ 40 °C / Humi.: <85 %
Storage Condition	Meter : -10 ~60 °C, Strip: 1~32 °C
Battery	CR-2032 (1 Coin battery)
Battery Life	3,000 Tests (with LED lighting: 1,000 tests)
Meter Dimensions (W x L x T)	53.6 mm x 94 mm x 14.9 mm
Weight	35 g(with battery)

OEM / ODM Available

Put your identity in the product

Imagine your unique strip that boosts your business.

The moment your customers meet the unique strip, they will think this product is customized exclusively for them. It will build your identity and differentiate your sales from the sales of conventional "me-too strips". We create a whole new range of strips for you. You can have the world's most innovative strip, this will lead you to take the superior position in the competitive BGMS market. Make your own successful story with CERAGEM MEDISYS.

System Performance

Clinical Accuracy

Consensus Error Grid Analysis (CEG) is accepted as one of the "gold standards" for determining the accuracy of blood glucose meters. CERA-CHEK™ shows excellent performance from the analysis where all the test results fall in the clinically valid region A within +/- 15% error.

Within Run Precision Test (Venous Blood)

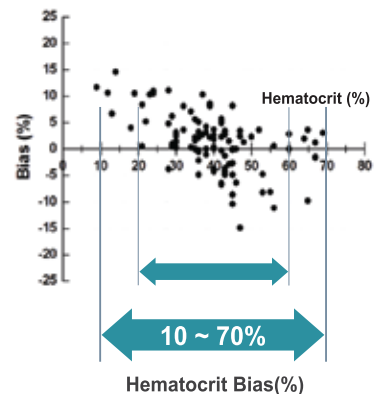

In our continuous quality control procedures, the CERA-CHEK™ 1070 BGMS revealed the highest Within Run precision from lot to lot data measuring.

Glucose Average (mg/dL)	SD	CV(%)
45 (2.5mmol/L)	2.4	4.9
98 (5.4mmol/L)	3.1	3.1
129 (7.5mmol/L)	4.3	3.2
228 (12.7mmol/L)	7.0	3.0
326 (18.1mmol/L)	7.3	2.2

*SD=Standard Deviation **CV=Coefficient of Variation

Influence of Hematocrit

CERA-CHEK™ applies latest advanced technology to minimize influences of hematocrit. The different hematocrit level is the main cause of errors that degrades the accuracy. CERA-CHEK™ shows excellent suppression of hematocrit influence from 10% ~ 70%.
